

cab calloway

I chirp and I trill, and if you use your imagination, I might sound a bit like Minnie the Moocher. I am a mild mannered, laid back boy who has a gorgeous soft coat, and **the cutest milk mustache!**

Calloway enjoys the attention of his foster mom and bonds easily once he trusts you. He will become part of your family in no time! He has the sweetest disposition ever. He also loves to sit on the window sills and look outside. Calloway is a sweetheart of a kitty!

Calloway does have a limp, and seems to have had some damage to his one hind leg after being hit by a car. He does not like to have it touched, and he does treat it gingerly. He hops up onto window sills, but he will lay down carefully, and sometimes lets his leg hang down from perches.

Calloway has been diagnosed with diabetes and requires insulin shots twice a day. His foster mom's work schedule can't accommodate his insulin schedule, **so Calloway is looking for a new family, or a new foster family**, who will help keep him healthy for a long time. Will you be Calloway's new family/foster family?

Calloway would do well in a house with or without other cats. He is fine in his foster home, and shares his space with other kitties just fine.
